Walters is accredited to ISO 9001 for Quality Management, ISO 14001 for Environmental Management and OHSAS 18001 for Occupational Health & Safety.

Challenges

Walters were engaged by Northern Racing in late November and handed the challenge of rejuvenating the main entrance area of this famous old Racecourse in time for the main event in the Chepstow racing calendar, the Coral Welsh Grand National on 27th December.

Solution

Walters responded quickly to establish the Client's requirements and mobilise labour, plant, equipment and materials to site to get the works underway.

The works commenced with service disconnections and removal of asbestos containing materials from the redundant buildings. The redundant buildings were then soft stripped and demolished. The arisings from the demolition works were cleared from site to licensed recycling centres.

Walters designed and constructed two new Event Plateau's at the main entrance into the Racecourse. The Event Plateau works included the construction of all associated retaining walls, brickwork, rendering, drainage and service infrastructure.

Following construction of the new Event Plateau's, Walters resurfaced the entire racecourse entrance area with new tarmac surfacing to finish the job.

Walters skilled and experienced operatives completed the Chepstow works on time and to the Client's budget in extremely challenging winter conditions. The works transformed the entranceway to this famous old Racecourse, enhancing the race day experience for the Chepstow punters.
